Open Economies Review		110	1
Food Policy		119	1
Other Refereed Journals			32
Other Miscellaneous			19
Total			120

Since 1997, 120 of the manuscripts that have appeared in the Centro Studi Luca d'Agliano Development Working Papers series have been published, i.e. an average of 8 papers per year. Of these, 101 have appeared in refereed journals, while 19 have been published as chapters of edited volumes.

To measure the impact of the different publications, we have used two well known rankings. The first one has been assembled by the Tinbergen Institute in the Netherlands, and assigns three possible grades to each journal. The top five, general interest journals (*American Economic Review*, *Econometrica*, *Journal of Political Economy*, *Quarterly Journal of Economics*, *Review of Economic Studies*) together with the *Journal of Finance*, have received a “AA” ranking. Top field journals and very good general interest journals appear under the “A” category, while second tier general interest journals and field journals appear in the “B” category. Overall, about 130 journals in economics, finance and business are ranked by the institute. The second ranking is the one proposed by Kalaitzidakis et al (2003)¹ in an article that appeared in the *Journal of the European Economic Association*. This study is based on a recursive impact factor methodology (see column 5, Table 1 page 1349). As shown by the table, the ranking proposed by the Tinbergen institute and the one by Kalaitzidakis et al (2003) are highly correlated.

Of the 101 papers which have appeared in refereed journals, 67 have been published in journals with rank B or above. While only 1 paper has been published in a top-five journal², 9 articles have appeared in leading general interest journals like the *Review of Economics and Statistics*, the *Journal of the European Economic Association* and the *European Economic Review*. 20 have been published in top field journals like the *Journal of Public Economics*, the *Journal of International Economics* and the *Journal of Development Economics*. This research output easily positions LdA as the leading research centre in Italy focusing on international trade and development economics, and as one of the leading centres in Europe specialising in this area.

Besides carrying out cutting edge academic research, LdA has been involved in the active dissemination of research output in the policy arena. Several papers have been published in leading policy outlets like *Economic Policy*, the *World Bank Economic Review* and *World Development*.
